- “[The story is] beginning to resonate deeply, especially for someone like me who became increasingly obsessed with reading and exploring, during the era when the WoA series was dominant.” (RPGgeek review) - “With the story being an always evolving one... it leaves the player with many possibilities of how to approach the story and how to play the game. This is a simple yet far superior approach to other games with fixed stories.”

(RPGgeek review) - “With the game’s lengthy story mode, it is far and away the game to choose from for a story-heavy RPG.” (SeemsLikeRPG review) - “[The Elden Ring Product Key is] a curious title, but it’s not difficult to see why this is so, even for a handful of games.” (RPG Geek review) - “[The Elden Ring is] thoroughly recommended to those looking for a story-heavy role-playing game.” (RPGgeek review) - “[The Elden Ring is] an

incredibly deep story with a fantastic ending that will leave you in tears.” (RPGgeek review) - “Despite its age, Elden Ring still feels like a modern game, and there’s a lot of heart in the story and the intense battle system.” (RPGgeek review) - “The Elden Ring game is an experience that evokes goosebumps and is full of precious and poignant moments.” (RPGgeek review) - “[The Elden Ring is] a beautifully crafted rpg in its

own right... the story has heart and shows maturity, and the gameplay [is] engaging... this game has a wonderfully emotional story that will stay with you for a long time.”

(RPGgeek review) - “[The Elden Ring is] still a solid action RPG, even though it feels rather outdated in some aspects.”

(RPGgeek review) - “[The Elden Ring] gives you a truly unique game, with an intriguing plot.”

The CRTC has given a green light for broadcast stations to experiment with short-form video broadcast, provided they keep expenses low. The public can submit comments on

short-form video until Oct. 2, 2013. The CRTC found that it isn't currently economical for any broadcaster to offer short-form video — which could be one minute or less — given current broadband speeds and the cost of satellite feeds. But the commission will monitor short-form video broadcasts if they are made available. The CRTC also wanted broadcasters to

experiment with identifying what kind of content is suitable for short-form video, and allow its use for children's programming. The CRTC didn't anticipate that short-form video would be broadcast at irregular intervals to catch a user's attention. Instead, the commission wanted broadcasters to emphasize short-form video during their regular broadcast schedules. The public can

submit comments on short-form video until Oct. 2, 2013.

Ocean Water Changes During the Last 500 Million Years

Ocean water changes during the last 500 million years

By most accounts, the past half-billion years have been a period of rapid climate change, punctuated by a number of "snowball earths" (in which the planet cooled down and was glaciated). There have also been periods in which the

Earth's oceans warmed up dramatically, perhaps to the point of evaporating. Now, new work by a team of researchers, published in Science, suggests that the oceans have undergone the most extensive cooling yet, changing at least 100 times as much as the last 500 million years, according to the study. How dramatic was the decrease in ocean temperature? Water passing through lava tubes

melted and seeped into the basalt flows, where it converted to diamonds. Advertisement Ocean waters in the past 500 million years Image: Eon. Crustal evidence for the past 500 million years, based on volcanic rocks This chart, based on the work of Larson et al., shows the distribution of volcanic rocks from the Ediacaran to the present. Waters hotter than about 250°F are dark,

purple; those that cooled to between 70°F and 150°F are white; and ones that cooled below 70°F are transparent. Image: J. Tack, Univ. of Alaska-Fairbanks
