What is a "black hole," and why would it tear a hole in space? Where would a black hole form, and what would happen if it falls into a planet? Could a black hole swallow an entire planet, or is that impossible? Where do black holes come from? And why are they so important to science and space exploration? This book answers these questions and many others, allowing children to discover the past, present and future of black holes. With its lively artwork and engaging writing, Kids Black Holes takes black holes out of science class and into exciting new territory.Â Please contact us if you have any questions about this book or if you would like the author's web site address. It was a real shame that I didn't do something a bit different this year when I went to online fabric in Dublin last week and saw these beauties for my very own. They are for sale at the moment and normally at a wholesale price. They are £5.50 a pot and I don't expect them to be on sale long. The penny had
